Subject: RE: FOR FEEDBACK: Proposal for Critics Update

I have also called dept comms to see if they have any additional numbers on PHAC deliveries out to PTs as the Minister only had the N95 number in her speech on Tuesday and have told them what the timeline is for this afternoon.

From speech:
"And, our government has distributed more than 2.7 million N95 respirators."

Thanks,
Cecely

The one we're still looking at. My understanding is that if whatever is eventually published changes, numbers will be higher than what we're looking at.

When you say "current version", do you mean the version that is published or the one we're still looking at internally?

Subject: FOR FEEDBACK: Proposal for Critics Update

Hello—For the critics update, what does everyone think about using the following:

- Increases from last week based on current version of web table;
- Totals from current version of web table;

- Distribution numbers from PHAC. The rationale here is to present a new metric to distract somewhat from unattractive delivery numbers being reported. Hajdu goes into QP with these numbers, updated weekly, so we're in safe territory:
    - The Public Health Agency of Canada is receiving staggered delivery of shipments, and to date, has allocated approximately 2.5 million N95 respirators and equivalents (e.g., KN95 respirators; FFP2), 100 million surgical masks, 26.5 million pairs of nitrile gloves, 12 million face shields, and 2 million protective gowns to provinces and territories, and more is expected to arrive and be distributed in the coming days.
