Subject: Re: Large stock of n95 masks and other medical products for sale

Ventilators = 2,500 this week, 10,000 in about a week

Covid-19 testing kits = 12,000 this week, 100,000 in about a week

Hello Mr. Gourvès,

Thank you for the reference number. This will help us find your form.

Can you provide me with the number of ventilators and testing kits you have available?

Thank you,

Chelsea Kusnick

Hello Chelsea,

I registered for the action plan by filling out the form on this website on April 1, and on April 3 I received my registration number, #45340.

Did I do it correctly?

I am writing to you because Rob Ford of Ontario said in the news that he is relying on federal (meaning you) inventory and he is concerned even now because he's afraid there is not enough inventory.

I have a lot of inventory.

What steps should I take now to get my inventory to you?

Thank you.

Sincerely,

Yan Gourvès, President

Hello Mr. Gourvès,

Thank you for your interest in supplying COVID-19 pandemic-related products. We appreciate your willingness to intervene and help our community and our country during this period of uncertainty.

Our government has created a form that we invite you to fill out. This is a way to allow all the information and offers to be assessed. The form can be found at the following website: <https://buyandsell.gc.ca/supplying-goods-and-services-in-support-of-canada-s-response-to-covid-19>. After completing this form, please send me the reference number once you have it.

Again, thank you for offering your support. If you have any questions or concerns, do not hesitate to contact our office.

Sincerely,

Chelsea Kusnick

To whom it may concern

Hello,

I run a small international business consulting firm in Montreal for businesses or individuals in Canada. I have business contacts around the world, including in China.

My firm is Chinese and as such I was able to secure a supply of millions of masks and other medical products as well as the government and political contacts to avoid delays and diversions.

My supply chain is reliable and redundant.

How can we proceed to ensure that you get these products as quickly as possible to better protect our medical personnel?

Thank you.

Sincerely,

Yan Gourvès, President
