Hello,

In this time of pandemic, would it be useful to have an automated tool that would allow you to resume your activities while protecting your customers and staff? If so, the VisionDel VCAD-2026 remote body temperature sensor is the right device for you. As shown in the attached video, an alert will sound when a person has symptoms of fever, allowing access to the premises to be restricted.
<https://vimeo.com/418898151>

If you had about ten minutes to talk to me, I could explain how this device works; it is less expensive to install and use than other preventive methods. Please let me know when I can call you.

Thanks and have a nice day,

VisionDEL
