That's wonderful. THANK YOU SO MUCH. YES, please direct us to Health Canada now.
My manufacturers says other companies without ANY certification in China are exporting to Europe with extreme outbreak now— TIME is LIFE now. On the website we notice Canada inciting all domestic manufacturers start producing without any certificates accreditation. I notice BEER company producing hand sanitizer now and sell already. Also there is notice that products in other country without canada accreditation but their domestic accreditation can apply? Flexible policy during Emergency time?

We may need to learn about quantity needed — most important manufacturers busy with different exporters from other countries. definitely have them to give priority for canada but quantity needed so they can make PLANS. also need price range with different quantity

Thanks.
May

Hi May,

Have you registered on buyandsell.gc.ca? I cannot respond to quantity specifications, and if you are looking to get your product certified and licensed in Canada, I can redirect you to Health Canada. I have notified the Procurement team and they are aware of your capabilities. Now we keep checking for updates, as they are securing products and services for Canada as soon as possible.

Best,

Madison Taipalus

Good afternoon Madison!

Back to busy Monday.

1) 80,000 N95 Masks READY to GO Immediately

We have 80,000 N95 masks manufactured in Columbia, imported to China during the outbreak there but were delayed so NO DEMAND in China now so the importer would just like to send here to Canada. READY to go immediately, fairable price. They are not FDA accredited but NOISH accredited by the Columbia government Intitute for National Occupational Safety and Health. Please see attached and let me know if I should have it reported.

2) Millions of Disposable Surgery Masks Availabke right from TOMORROW! Quality Accreditation Required for the Medical Surgery Masks ? Quantity Purchasing ?
