**Subject:** RE: thanks for the chat

Hi Tom,

Thank you for showing interest in providing services and products related to the COVID-19 pandemic. In addition to leveraging existing sources of supply, PSPC is now proactively engaging industry to help meet Canada's needs.

Many of us are receiving information from potential suppliers or individuals with helpful information on the COVID-19 response. I invite you to this website: <https://buyandsell.gc.ca/calling-all-suppliers-help-canada-combat-covid-19>. As this website will continue to be updated, I encourage you to check back for new information that may be posted.

My department is reviewing the significant number of responses and identifying potential suppliers for the goods and services that may be required as the COVID-19 situation continues to evolve. I have informed my team in Minister Anand's office of your proactive reach out.

Please do not hesitate to follow up with any questions, or share any relevant information that I can include in while tracking procurement opportunities (i.e. specific products, quantity available, production capacity).

Thank you,

### Madison Taipalus

Hi Tom – good to hear!

I've CC'd my colleagues from health and PSPC who will be able to get you the info you need.

-Tim

Hello Tim,

Solara also has plastic fabrication capabilities that we use for our electronics cases and accessories. These can be re-tasked for medical plastic components.

Koven Technology and ourselves sourced a design for a clear face shield that has been approved by the Czech Ministry of Health. We would be willing to make these at cost.

Koven Technology is a medical device manufacturer, so could ensure quality to medical standards. We have materials on hand and can start immediately.

What is the process on whether there is real interest in what we could supply? Is there a web page, or a procurement lead, or some sort of coordinator we could work with?

Best regards,

-Tom
