Hey

Trying to find ways to ensure the information for manufacturers is clear and that we have the right information available in the right place online.

Attaching two documents with the key questions we get and wondering if we can create “fact sheets” in French and English that could be posted online (links for “[Canada’s Response Page](#)” as well as the “[medical device page](#)” and the [Drugs](#) page – the three key landing pages for people looking for this info) the with the answers to these questions to help funnel people into the right place?

I think this would help us stream line a lot of inquires.

Happy to chat – Thanks!
