I guess we wait for MINO before sending these lines to the group?

Begin forwarded message:

On point 3 (lines re: registry), here is our draft language (still waiting on green light from MINO and task forces on publishing the registry):

- The Vaccine Task Force is committed to transparency and has a robust conflict of interest process in place.
- The process is consistent with the practices of other volunteer external advisory bodies to government and embodies international best practices.
- Given the significant interest in the Vaccine Task Force's process, the Task Force is taking the exceptional step of publishing a registry of declared interests.
- The registry will be updated on the NRC's website following each vaccine announcement by the government that is based on a Task Force recommendation.

Simon, once you and MINO are good with this, we will share with partners. NRC is standing by for green light to publish the registry.

Thanks,

Vicky

Subject: VTF Update

Quick update.

VTF website: NRC just finished translating changes – now lines up with KMs. Ready to go tomorrow.

Registry of recusals: Waiting for green light from MINO. Roger socialized with VTF members tonight. Small changes needed but generally good. He also checked in with the Therapeutics Task Force co-chairs. Concerns expressed but they are looking at the language. Roger has also connected with the Immunity Task Force secretariat. They need to discuss with their members. Otherwise translated, and NRC web team ready to go tomorrow.

Lines re: registry: We are working up strong lines on the registry (commitment to transparency; advisory committees don't typically make this public; people interested in process; robust process; etc.).

We are in constant contact with Roger, the NRC, Health, PSPC and PCO.

Will keep you posted. Thanks.

Vicky
