Let me touch base with them again. Merci!

Ok, then I suggest we just post as a secure PDF perhaps they should add a watermark "sample" on it.

Hi – it's not for someone to fill out, I should have been clear, sorry...we need to post it for transparency as the media is calling, asking what the process is.

Yes you are right we need to have it in Word to be able to convert it to HTML

However this looks a lot like a formal form, that someone needs to fill out and return somewhere via email or would they need to print, physically sign and return via mail or email. I think we can make an exception and have it posted as a PDF.

Subject: VTF webpage

Hi Nadine – we will need to publish this quickly on the VTF page...I have asked ISED how they want it posted...as a PDF, it would not follow accessibility standards. I also need the French from them.

I assume you need it in Word for coding?
