Matt,

I wanted to follow up on Ayman's note from yesterday.

Please find attached the document referenced in the original note.

We want to help you and the team in the overall response efforts to the benefit of all Canadians and are ready to deploy our capacity at Bromont as needed.

I'm currently on maternity leave but still engaged and here to answer any questions you might have or help convey guidance back to our internal team.

My cell is 343.550.9020.

Hope this finds you and the family healthy,

ALAYNE CRAWFORD

Head of Government & Regulatory Affairs

IBM Canada

The Honourable Justin Trudeau, Prime Minister of Canada

Subject: The Fight against COVID-19

We are writing to you today to offer our help in Quebec's fight against this terrible pandemic.

IBM Canada has a modern multi disciplinary plant with several features that we believe could be of great benefit to government authorities in this time of health crisis.

Our company has always been at the forefront of the latest technologies and, as a corporate citizen, we want to be part of the solution in the fight against COVID-19. With this in mind, we propose, today, to use the facilities of our Bromont plant to carry out operations that could be useful to you and that you will consider necessary.

Several features specific to this strategic facility are available. Our plant has, among other things, various types of clean rooms with a combined area of 50,000 square feet, efficient water purification systems, steam production, vacuums, a nitrogen plant and a high purity compressed air system. We believe that this equipment would most certainly be useful to you in your fight against this terrible disease.

Part of our plant is currently in production, having been confirmed as a priority by your government. We have access to an efficient and available supply chain. We have the opportunity to add new employees to contribute to this effort. Attached is a document presenting part of the facilities.

Rest assured that IBM Canada and its employees are available and wish to contribute to this courageous fight. We are here to discuss the next steps in further detail.

Thank you.

Ayman Antoun
