Hi.

Confirming that what I sent at 9:15 below is accurate.

Hi.

Officials are advising of the following:

The eagle report is a snapshot of a point in time - and updated regularly (daily). It would be more prudent to cite the following publicly:

On Monday, the first of several shipments of rapid tests started moving to QC. 172, 800 Panbio tests were shipped to QC and for ID NOW, 81 instruments and 30,696 tests are packed and ready for pick-up by the first available vehicles.

Planned shipments this week will inject almost 600,000 test into QC's testing capacity this week.

Thank you! Can you advise if these numbers can be cited publicly?

Hi.

The attached eagle report indicates what tests QC will be receiving this week.

Looping in Marie-Chantale as the PPE team advises that they can pull together what you are looking for re: PPE, but in terms of test kits, this is outside of the NESS scope.

Marie-Chantale – could you please coordinate/confirm test kit #s via the testing side?

Thanks
Jobina.

Hi! Let's say EOD, it's less urgent now

Would that be doable? I have some flex

Hi Jobina,

I'm hoping to find what QC is expected to receive this week in terms of PPE, test kits, etc. Would that be possible to pull within the next 30 mins?

If we can't pull the numbers, could we get ballparks – i.e. “thousands of pieces of PPE” and/or “hundreds of test kits”, that would be very helpful!

Thank you,
Ash
