Hi Kendal,
As per the DM's request, please see below. Think it also covers what Pam sent
Luke

_____

Colleagues,
As promised on our teleconference this evening, I am re-sharing a link to the
Health Canada guidance on optimizing the use of masks and respirators during the
COVID-19 outbreak. This includes:

- guidance on the use of expired N95 respirators and masks; and
- guidance on the use of commercial-grade respirators for medical purposes.

As President Namiesniowski noted during our call, the guidance on the use of personal
protective equipment (including N-95 masks) for non-medical settings is included in the
following document entitled Risk-informed decision-making guidelines for workplaces and
businesses during the COVID-19 pandemic . Additional public health guidance on COVID-19
released to date can be found: https://www.canada.ca/en/public-health/services/diseases/2019-
novel-coronavirus-infection/guidance-documents.html

Finally, I want to pass along a number of additional resources below that you and your officials
may find informative, including the first three sections of our new consolidated Health Product
Industry links: diagnostic tests, ventilators, and disinfectants and sanitizers. The next topics to be
prioritized will be Personal Protective Equipment (including masks, respirators, gowns, gloves
and 3D-printed PPE), and vaccines and other treatments. These will be live over the next few
days.
