No, not exactly. It would have been informed by both because the DM's request (have pasted below) asked for wave 1 measures and then resurgence efforts being considered or implemented. Where the responses were lacking from some PTs, my understanding is the team did supplement with previous input (e.g., from roundtables and the ON scan) and then requested that the PTs validate and/or add to it.

Dear Colleagues,

The discussions on the Safe Restart Agreements (SRAs) have shown a strong commitment to collaborative action that minimizes the impact of a possible resurgence of COVID-19 infections. As each jurisdiction works to ensure the right measures are in place to continue to protect the health of Canadians, it will be important to share information on measures that are being put in place, what is working well, and areas where course corrections may be needed.

I continue to value the constructive information exchanges during our CDM teleconferences, which have included best practices and strategies to strengthen protection from COVID-19 for our most vulnerable in the long-term care sector. As we prepare for a possible resurgence, I believe that continued information sharing will be critical to ensure that we do not experience the same crisis we faced in the spring. To this end, and to support all jurisdictions in their planning, I am writing to seek your assistance

in providing us with information on relevant short-term plans and activities to strengthen protection of residents in long-term care in your jurisdiction.

In particular, I would be interested in receiving information on long term care measures (1) put in place in the first wave (noting those that were potentially effective); and (2) that are currently being considered or implemented for a possible resurgence. Examples:

- Infrastructure;
- Infection prevention and control
- Personal protective equipment (PPE);
- Testing and contact tracing;
- Health human resources; and,
- Family caregivers and visitors.

Thanks Luke. Is the "First Wave measures" provided from our internal scanning and the "additional measures put in place" the responses we just rec'd from PTs?.

You are all amazing!! Thank you so much.

Kendal, here is the LTC package for your review. Pls let us know if there is anything else you need.

Subject: LTC docs

Hi Amanda,

Attached please find:

- The latest roll-up of PT inputs. BC replied that should be responding by cob BC time (i.e., 7:30 tonight).
- One pager of the key themes, areas to highlight, etc. updated from the previous document our team had done
- Copies of the full Ontario and BC plans for her prep. ON's plan is expected to be [released in the coming weeks](#).

- A one pager on the work that CFHI is doing

Apologies for the delay and please let me know if you have any questions.

Thanks!

Meghan
