This sound right to you? VTF is pretty high-profile...

If so, will add SFT language (below) as responsive and send to translation for main messages only tonight?

- In the long run, the best way to end this pandemic is with a safe and effective vaccine.
- Canada's vaccine strategy is all about ensuring that Canadians will be able to get a vaccine once it is ready.
- There are many types of potential candidates. Canada is exploring the full range of options. The Government has already secured access to vaccine candidates and therapeutics, while investing in manufacturing here at home. And to get the vaccines out to Canadians once they're ready, the Government has made further investments in our capacity for vaccine distribution.
