Hi Melanie

I tried to duck out of this but can't.

Can we ask Flavia to help on this please, not to do but to share advice.

Cheers Dave

Hi Michelle,

I hope you had a nice weekend.

I wanted to let you know that we are waiting to hear back about Roger's availability to speak on the panel.

Also, Ibrahim's office will be reaching out to Linamar and CEA about participating in the plenary.

Once you hear back from David, we can send off some formal invitations.

Let me know if there is any news on your end.

Thanks,

Will

Hi Michelle,

Thanks for getting back to me.
Seems like you're quite busy!

Yes, this would be for plenary 3.
Typically, from my understanding, all the invitations to participate in a panel come from the moderator of the session.

Looking forward to hearing back from you and Dave.

Thanks,

Will

Hi Will,

I will try and look at this – and also need input from Dave. However, I've been in meetings solidly since 7 a.m. and still going. That being said, I think it is very important for Dave to see this before it goes to Roger.

Just so I'm clear – this is for plenary 3? So Dave would be moderating both the first and third one?

In terms of panelist invitations to be sent by Dave – do you mean for the SMEs?

Thanks,

Michelle

Hi Michelle,

I don't want to be of any bother. I am simply wondering if you have had a chance to look at the proposed plans for the plenary session below.

We would like to prepare a note with some updates for Roger before the weekend.

Thank you so much,

Will

Subject: RE: FOR DISCUSSION - CSPC panels

Hi Michelle,

Happy to lead the coordinating of this plenary session.

So the plan is to still have Dave on as moderator. We would like to ask Roger, new acting President, to represent the NRC as speaker on the panel.

I would need your help to suggest the appropriate senior executive speakers from IRAP clients such as Linamar and CAE to join the plenary.

Please take a look at the suggested panelist list and let me know your thoughts. Having four participants excluding Dave would be ideal.

- Moderator: David Lisk, Vice-President, IRAP, National Research Council
- Roger Scott-Douglas, Acting President, National Research Council
- TBC, Linamar Corporation (names forthcoming)
- TBC, CAE Inc. (names forthcoming)
- Arianne Rezza, ADM, PSPC (Procurement as solution providers)
- Andrea Johnston, ADM, ISED or Mitch Davies (Industrial challenges to pull on the market)
- Matthew Gilmour, Scientific Director, National Microbiology Laboratory PHAC (Redirecting existing assets to fill need)

I have also drafted an invitation for Dave to send to the potential panelists.

Let me know if you are comfortable with the description of the panel below and we can begin sending the invitations shortly.

Draft invitation to COVID-19 pandemic plenary.

Dear XX,

I am writing to invite you to participate on a plenary session that the National Research Council is organizing at the Canadian Science Policy Conference (CSPC) this November.

We are organizing a plenary session on “The first 100 days of the COVID-19 pandemic: Mobilizing Canada’s innovation R&D ecosystem and what we learned”, which I am Chairing. **I was hoping that you might be willing to speak on our panel – to illustrate the industry perspective on scaling up testing capacity, producing therapeutic and personal protective equipment, as well as creating the Vaccine Task Force.** The panel will take place virtually on **Thursday, November 19th from 4:30-6:00pm (Eastern Time).**

[CSPC](#) is held annually and attracts a diverse group of research and innovation policy leaders and practitioners to discuss issues related to science policy, science literacy, innovation and research funding. The COVID-19 pandemic has highlighted the role of public R&D institutions in mobilizing the innovation community. Canada’s federal science departments and agencies (SBDAs) responded in the early moments of the COVID-19 pandemic through support programs for the private sector to scale up testing capacity, production of therapeutic and personal protective equipment, as well as the creation of the Vaccine Task Force. This panel will present perspectives from both public and private institutions to discuss: (1) what needs were faced at the outset of the pandemic (testing, therapeutic equipment, PPE, modeling) and what we're our gaps; (2) what form of science and technology was needed to address the pandemic (at hand, applied, resident or build upon ready) and on what timeline (right now, or near term); and (3) what was done (refocusing of staff, facilities, and experts, innovative procurement, ISC and IRAP and NRC challenges) to respond.

The panel will be a 60-minute session + 20 min of Q&A, with four high-level speakers. We would be delighted if you could participate on the panel. Should you be interested in participating, William McRae, who are helping to organize the panel, will be in touch with more details.

I look forward to hearing from you,

David Lisk

Thank you,

Will

Hi Melanie, Michelle: Picking up again on this discussion, Will McRae (cc’d) from our team is able to help coordinate on this panel. However, we would welcome views from Melanie on whether we can adjust panels 1 and 3 and propose it as a plenary to PO.

Hi John,

I spoke with Dave. Have also cc’d Melanie, as I think we need her input on the idea of combining #1 & #3. Dave’s take is to keep it as straightforward as possible and that there is currently no bandwidth to take lead on the 3rd panel within IRAP – we can help, but can’t lead.

Subject: FOR DISCUSSION - CSPC panels

Hi Michelle:

As we've been discussing, we're trying to identify solutions for several CSPC panels, including two proposed plenaries, that relate to NRC's COVID response. The current issue is sorting out next steps on the NRC-led plenary ("Panel 3" below).

Currently, CSPC is anticipating the following panels:

- PANEL 1: NRC/IIO-led concurrent session on COVID and International RTO Responses
- PANEL 2: CRCC-led plenary panel on COVID and reflections on Canada's research response (With the heads of Granting Councils, CSA, NRC, and CFI participating)
- PANEL 3: NRC-led plenary panel on COVID and the role of the public sector in mobilizing Canada's innovation R&D ecosystem (see proposal from Iain/Dan below)

In discussions with IIO (Flavia Leung) it is understood that David Lisk will moderate the International RTO panel ("Panel 1"). PO has also asked for David Lisk and Roger Scott-Douglas to be on the NRC Plenary panel ("Panel 3"). There is an opportunity for NRC to be featured prominently during the plenary from several angles, including IRAP support for private sector, Royalmount, or the Vaccine

Task Force, however there is a need for clarity in terms of who is accountable for delivering on the NRC-led plenary panel (“Panel 3”).

Options for consideration:

1. Designate clear leads to scope and organize the plenary panel (“Panel 3”), depending on the desired focus
2. Consolidate the international RTO panel and the COVID panel (Panels 1 & 3)

Looking forward to hearing your thoughts on this.

John

PROPOSED DESCRIPTION OF PANEL 3, INCORPORATING COMMENTS FROM PO ON PROPOSED FOCUS, SPEAKERS

**The first 100 days of the COVID-19 pandemic: Mobilizing Canada’s innovation R&D ecosystem and what we learned
Proposed NRC Plenary Session**

Panel Description:

The COVID-19 pandemic has highlighted the role of public R&D institutions in mobilizing the innovation community. Canada’s federal science departments and agencies (SBDAs) responded in the early moments of the COVID-19 pandemic through support programs for the private sector to scale up testing capacity, production of therapeutic and personal protective equipment, as well as the creation of the Vaccine Task Force.

This panel will present perspectives from both public and private institutions to discuss: (1) what needs were faced at the outset of the pandemic (testing, therapeutic equipment, PPE, modeling) and what were our gaps; (2) what form of science and technology was needed to address the pandemic (at hand, applied, resident or build upon ready) and on what timeline (right now, or near term); and (3) what was done (refocusing of staff, facilities, and experts, innovative procurement, ISC and IRAP and NRC challenges) to respond.

Potential Speakers:

- Moderator: David Lisk, Vice-President, IRAP, National Research Council
- Roger Scott-Douglas (Vaccine Task Force)
- TBC, Linamar Corporation (names forthcoming)
- TBC, CAE Inc. (names forthcoming)
- Arianne Rezza, ADM, PSPC (Procurement as solution providers)
- Mitch Davies (Industrial challenges to pull on the market)
- Matthew Gilmour, Scientific Director, National Microbiology Laboratory PHAC (Redirecting existing assets to fill need)
