Hi Dom.

It looks like the answer may be yes but, shld prob check in with HC for greater clarity.

Shortly after the first approvals I think we covered a story in the daily suggesting it was happening in QC. I have also found this example:

<https://cliniquesmedicaleslacroix.com/en/our-services/family-medecine/covid-19-serological-test/>

But I haven't been able to find broader reporting on availability of the service.

Hey Mark! Hope you're having a great weekend!

Thao is asking whether people can go to private labs and get sero testing done for a fee. I've checked a few websites and can't find any confirmation of that. Do you know? Or can we check with HC?

Thanks!

Dom
