Hello there folks!

For Minister Bains' social channels, we're going to be putting out a weekly piece about Canadian innovation / procurement as it pertains to COVID-19.

Our first piece is about the use of house wrap/airbag fabric to increase domestic building capacity for medical gowns – thanks to this innovation, we're now able to produce millions of gowns in Canada thanks to this innovation. We put it out this morning on LinkedIn, Facebook and Twitter, in case the PM would like to share.
