Hey Sarah - I am also working directly with the city of Van on this. If you would like to connect them with me, would be happy to chat with them.

Subject: Re: City of Vancouver PPE for DTES

Hi Sarah,

The federal stockpile is distributed through to provinces and not directly to cities or organizations. Provinces can make requests for supplies for their healthcare system.

If an additional request came for something like this, i guess we'd have to consider it.

The main message would be to send them to Victoria for supplies first and Victoria could ask for assistance if they wanted.

Matt

Many of the front line staff in the DTES- particularly the non profits are running out. We keep hearing rumours that there is a federal stockpile but I am worried that non profits down there might be left out. We also are hearing from saint Paul's that they are running out. "
