Subject: Re: PPE Stats 8t Warehousing/Logistics support

Yes that's right, it is for September alone (based on PHAC's numbers). If you're looking for the numbers from March - September that would be closer to 700M total. If you want us to get that number we can, you'd just have to check with Health/PHAC for the distribution numbers over that time.

Thanks very much, Cecely! Question: when it says Quantities distributed to provinces from the NESS in September can I take this to mean the numbers are from September alone, not the total up to the end of September? So we delivered over 7M face Shields in September, not 7M between March and the end of September?

Subject: Re: PPE Stats & Warehousing/Logistics support

No problem at all - I would just ensure the numbers are double checked by PHAC as they are from their daily updates rather than something we received directly through the PSPC department.

Important point to note as well is that we are continuing to procure PPE: <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-PV-961-79134> <<https://buyandsell.gc.ca/procurement-data/tender-notice/PW-PV-961-79134>> We are prepared, but we continue to press forward to protect the health and safety of Canadians.

Hi Vanessa,

Following up with a few stats that may be worth including for tomorrow. FYI — N95s and gloves remain in high demand from provinces. The stats from the PHAC updates should be verified with Health, but we as we have received close to 100M pieces of PPE last month, I thought this may be of interest to highlight, particularly with the face shield domestic manufacturing piece.

Quantities inventoried by the NESS in September (August 31 PHAC update — October 1 PHAC update):

N95 masks: 16,639,400 (from international supply chains — mostly by GoC chartered flights)

Face shields: 2,914,384 (100% received from domestic sources)

Test Swabs: 2,464,200

Pairs of gloves: 21,287,150

Gowns: 38,708,606

Surgical Masks: 12,425,250

Total: 94,438,990

Quantities distributed to provinces from the NESS in September (August 31 PHAC update — October 1 PHAC update):

Face shields: 7,407,665

Pairs of gloves: 21,321,900

Gowns: 189,962

N95 masks: 50,000

Surgical masks: 7,055,550

Testing swabs: 603,075

+ Made in Canada 3D printed swabs: Tronosjet Maintenance Inc. (located in Charlottetown) has become the second Canadian company to receive HC authorization for 3D printed made-in-Canada swabs. Discussions are underway with PHAC/PSPC to discuss procurement options (first company was Precision AMD out of Winnipeg)

Also, as mentioned, here is the section from Minister Anand's speech from Tuesday to illustrate the volume of PPE and medical supplies that the NESS now has:

"Through our procurements we now secured more than 2 billion items of PPE for Canadians. We will continue to receive steady ongoing delivery of all types of PPE in the coming months.

With this increase in numbers of PPE deliveries including approximately 40% of the total dollar value of contracts now going to domestic companies, our existing warehouses are stretched to capacity.

This is a sign of proactive PPE procurement but also why I am pleased to announce that, on behalf of the Public Health Agency of Canada, Public Services and Procurement has awarded a new contract to Metro Logistics Inc. of Montréal to assist in the warehousing and distribution of PPE to the provinces and territories.

As the delivery of orders continues, the Public Health Agency's increased capacity to store and distribute PPE is critical. In addition to PPE, logistics will be just as important when it comes to distributing vaccines."

Thanks,
