Subject: testing deck
Attachments: DATATesting for COVID-19 in Canada-NML_photo.pptx

Proposed deck from HC for the brief. Circulating here in case a copy hasn't been sent to the PM.

Couple of thoughts from me.

I think we should be much more definitive on the following points: 1) where do we want to get to (it says "millions", but we are we thinking concretely?); 2) what do we see as timelines for achieving this – in other words, how fast can we ramp up testing?; 3) more concreteness in impediments to 1 and 2 (the deck focuses on tests specifically, but there is a huge HR component to test and trace); and 4) how do we – the federal government – think we can help solve these problems?
