**Subject: Big Rig details**

Hi,

Some info below on today's announcement:

1. Did Big Rig ever apply for a licence to product hand sanitizer or for an NPN/DIN? If yes, when? They applied today, June 26. They have not applied for a licence before today.
2. If they did apply and were clearly not approved (please advise us if app is in queue), what was the rationale for the denial? And was it in relation to Site Licence or NPN? N/A, See above.
3. What was the proposed input into their hand sanitizer in terms of active ingredient and grade? Based on the application received June 26, the active ingredient is ethyl alcohol and they have listed their product as FCC (Food Chemical Codex) grade.

Thanks,  
Ash
