Hi Brandon. Suggest you speak with Minister Hajdu's team at Health.

Not much we can do at PSPC on this one.

Alright!

The company is called Pulmonem, they have apply for HC approval of a COVID-19 therapeutic called PULM-001 and PULM-001 IV. It is a drug to dampen an overly aggressive immune response. The specific name of the "molecule" is called Dapsone.

The lawyer noted that the company feels in limbo with respect to Canadian approvals / the process, although it seems based on the documents provided that things are moving along well in terms of trials and are at the likely stage of needing support for commercialisation.

It feel like it might be an ISED situation, but I am a bit green to some of the technicalities, so any directional advice you can provide would be appreciated by the Minister.

Thank you!

Hey Brandon – adding Tyler from my team who is covering Atlantic region.

From PSPC side, we would encourage the company to register for updates on RFPs for all Covid procurement at this site: <https://buyandsell.gc.ca/supplying-goods-and-services-in-support-of-canada-s-response-to-covid-19>

Feel free to share more specifics if/when you have them, I am happy to ask our officials for more information if there is an ongoing conversation with PSPC. But from the approvals side we differ to Health.

Thanks,
Caitlin

Subject: Question: local stakeholder interest in supporting COVID-19 efforts

Hi Leah and Caitlin,

GEDS didn't note your Atlantic Desks, so I hope you can help out with a question or if you can direct me to your team's Atlantic Desk, that would also be great!

Dom is meeting with a stakeholder tomorrow who is has received some form of approval from HC regarding vaccines. I'm speaking the company's lawyer today to get a better sense of what the full situation (something may be 'jammed'), but if you have any holding information on how local businesses can support the efforts of the government during COVID-19, it would be greatly appreciated.

Thanks!
