Tier 4 - COVID-19 - Seamstresses helping with medical  
supplies**

**CONTEXT** (for your information): The reporter is looking to get more information on the work of the Canadian consulate in Guangzhou that has been assembling a list of trusted manufacturers and suppliers of medical equipment that could be useful for Covid-19 cases.

He understands this is a complement to the efforts made through [Buyandsell.gc.ca](http://Buyandsell.gc.ca).

After consulting with GAC, PSPC will provide the response to the reporter. We recommend a narrative response that would answer all four questions.

We will share our proposed response with GAC.

#### **QUESTIONS / RESPONSES:**

**Q1. How many Chinese manufacturers have now been documented as potential suppliers of medical equipment at the moment?**

**Q2. Roughly what percentage of those suppliers have already been contacted by Canadian authorities?**

**Q3. What percentage of Chinese suppliers have already received orders for medical supplies?**

**Q4. Given the race to secure proper supplies, is the Canadian government responding quickly enough to make orders in China – particularly as other countries make orders that could push Canada down in the queue?**

The health and safety of Canadians is the government's top priority as we respond to the COVID-19 outbreak. ~~We encourage all Canadians to follow the recommendations of public health officials to protect the health and safety of Canadians.~~

Public Services and Procurement Canada (PSPC) is supporting the whole-of-Government response to ~~Coronavirus disease COVID-19~~ by spearheading the consolidated purchase of emergency equipment, supplies and services for the federal, provincial and territorial community at large. We have stood up a dedicated team of procurement specialists who are tapping into existing supply arrangements and employing innovative, flexible approaches to make sure Canada has the equipment, supplies and services it needs to effectively respond.

We have already purchased a broad range of personal protective equipment and supplies, including swabs, tests kits, gloves, masks and gowns, and we continue to work with available suppliers, domestically and internationally, who have the capacity to respond to Canada's needs.
