Shipping will be 10 to 14 days.

attached are product information documents

Please advise so that we can get these orders in the order Q as soon as possible.

thank you

Below is info on the Emergency Use Authorizations

20 tests each. Suitable for the qualitative detection of Coronavirus (SARS-CoV-2 / COVID-19) N-Protein IgM / IgG antibodies in human serum, plasma, whole blood, or finger prick samples.

This product is for in vitro diagnostic use, following guidance from the FDA for Emergency Use Authorizations of tests submitted for approval on March 16, 2020. This test has not been reviewed by the FDA and results from antibody testing should not be used as the sole basis to diagnose or exclude SARS-CoV-2 infection or to inform infection status.

What is the difference between IgG and IgM?

Immunoglobulin G (**IgG**), the most abundant type of antibody, is found in all body fluids and protects against bacterial and viral infections. Immunoglobulin M (**IgM**), which is found mainly in the blood and lymph fluid, is the first antibody to be made by the body to fight a new infection.

Thank you Elaine very much and a pleasure and honor to meet everyone on this thread. I have copied WMGR's Tom Beaulieu on this thread whom will assist further.

Hopefully these tests can be utilized to help the wonderful citizens and people of Canada.

Keep up the great work and please stay safe,

Brian

Hello.

I have been instructed by Dove Parmar, from Minister Anand's office to share an opportunity to procure COVID-19 rapid testing kits.

Details of the product are found in document attached.

Please accept this introduction to Brian Esposito, (cc above) who can provide more information about the kits. I have instructed him to complete the sign-up form on the Government of Canada buy and sell page.

Best,
Elaine
