Hello Dove,

Here's another supplier, as FYI, I've referred them to the buy and sell website and provided contacts you've sent me.

Best,

Alice Zheng

Subject: Test Kits

To: Omar Alghabra 

Hi Omar

Through my work at CBC, our board explored the potential need of essential items such as Masks and Test kits. We know there are many government services available now to help Canadians in the fight with Corona spreading. This will immediately qualify.

Below is some information for Corona test kits that are readily available upon request. I have included some background and current day use. These are coming from the very 1st factories that created these kits for the easiest simplest and most effective means. Also attached is a short video to demonstrate the simplicity. It is recommended however, that the testing is conducted by a professional health care worker.

The strongest advantage of this reagent :

- Results in 15 minutes. Affirms whether someone has the virus or has had the virus, which could indicate who has immunity. No other equipment necessary
- Tests SARS-CoV-2 and Covid-19 with high accuracy via a molecular point of care.
- 99% accuracy. Ease the strain on existing lab testing. Use random Lab testing after these kit to assure consistent accuracy. In the meantime, testing more people far quicker for a lot less
- Has been approved by the State Food and Drug Administration (CFDA)
- Production volumes 100,000 units weekly. Can, supply by weeks end
- History; many units have been used to test on people. Currently used in Hospitals, medical centers, emergency centers, testing centers ... etc)

Can test many people very quickly in determining whether someone has or has had Covid-19. These cost \$25USD/kit. Can get more Canadians tested quicker at their homes or place of residence.

These kits already have a MDSAP Certificate meeting ISO 13486-2016.

As of March 5th 2020, Qarad from Belgian helped acquire the device appliance certificate. In Canada, under todays situation, can easily and quickly qualify and receive the device certificate for use

PRESENT DAY USE

China top virus expert Zhong Nanshan uses this Rapid test kit. This test kit has been used by Zhong Nanshan in Guangdong and Wuhan with over 100,000 test cases. Presently, China is flying many medical doctors and volunteers to different countries, these use these kits to help quickly test and separate patients. Has proven to help the spread of the virus.

Please advise if this is of interest or if you need any further information. We should also consider asking our Federal government to look at this asap to assure we have more Canadians tested at a much quicker pace.

Kind regards,

Fares Sultan
