Subject: Supply of N95 masks for Canada

Hey Mary-Liz,

Sorry to interrupt your Saturday morning. This message comes to me through someone that my business partner is connected to in Vancouver. This is someone who can supply N95 masks. She is asking to help get connected to the right people.

Here is the full message:

A business partner of mine currently has access to 60 million 3M N95 Masks in Canada. 30 million of the 8210 variety (industrial grade) and 30 Million of the 1860 variety.

He also has access to a consortium of 3M distributors in Europe that have pooled their resources together and are selling their products to various buyers. Last week they sold 100 million N95 masks to the governments of California and Texas. He has assured me that he can get Canada the masks that we need!

Every transaction that we're doing goes through an escrow account starting at 50% of the value, followed by an SGS Inspection, then the other 50% followed by a final SGS inspection if the product is getting shipped.

After hearing the news that Trump has asked 3M to stop providing access to Canadians, I am highly motivated to make sure that Canadians maintain their access to masks and other PPE, until Canadian manufacturers are ready to supply our health care system internally.

We just had a meeting with Patrick Sackville and Rana Shamoon from the Ontario government are we're setting up a profile with them as we speak.

Please contact me as soon as possible as these transactions are time sensitive and highly competitive.

My phone number is [REDACTED]. Email is [REDACTED]

With my sincerest regards,
Zahra Liberté Aldünia

PS: We've just received an update that there are 300 million N95 Masks coming out of a 3M Factory in Holland that have been allocated to a trading company based in Holland. HOWEVER, the trading company has failed to provide the adequate documentation required for KYC / AML processes. Being that it is ~3 a.m. currently in Holland; this gives us a very short window of opportunity to secure this lot.

The 3M lawyer has advised us that it is the LAST lot available before all 3M products are rerouted to the U.S.A.

Given our proximity to the 3M lawyer, they have agreed to reroute this lot to a Canadian Government if we act quickly by providing a letter of intent, which would be followed by standard 3M procedure led by your escrow (50% of the value) which would then trigger their SGS. CIF Toronto is fine, with final payment release at the final SGS inspection in Toronto. There is no risk or interruption by brokers.

This is an opportunity that we need to take advantage of urgently as a country, whether it is at the provincial or federal level.

The 300 N95 mask costs (without any commission) are broken down as follows:

100 Million (8210) at \$4.8 USD

&

200 Million (1860) at \$ \$4.95 USD

(+ 3% or recommended commission)

In addition to this, we have also found out that there may be 60 Million 3M N95 Masks available in Canada (30 Million of the 8210 Variety, and 30 Million of the 1860 Variety). We can only confirm the details for this lot by tomorrow.

Please contact us as soon as possible as these transactions are very time sensitive in the current climate.
