Hey Anthony,

Did you end up following up with this?

Hi Elliott — you guys must be swamped. As FYI we received another follow up from the same company that was flagged from Michel yesterday.

See below. Quebec company saying this will sell their secured stock in china, to an international buyer if we can't provide a confirmation.

Caro

Hello, Caroline.

For our part, we need to get the MDEL licence we applied for by filling out FRM-0292 attached on April 1, 2020, as soon as possible. The site gave a wait time of 24 hours, but we have followed up several times and never got a response.

We have PPE ready to go this week, and we need proof of an MDEL.

You can reach me at 514-377-1916 to discuss the matter, or you can put me in touch with the right people at Health Canada to finalize our MDEL.

Thank you.

Hello, Caroline.

Thanks for your follow-up.

To answer your question, it's a real mess with Health Canada. We are getting answers back, but we can't get clear and complete instructions or the name of a resource person from Health Canada. We have been trying to figure this out for two weeks and we're getting nowhere, either for what we can do locally or what we are importing.

You can see the notes from the person in charge of the file with Health Canada below.

FYI, we have a lot of 1 million surgical masks that will be ready to be shipped from China on Thursday.

- With the obstacles in our way, we risk having the lot stuck in Customs.
- I think the federal government is organizing transportation for these supplies. Can you see if we can get our masks on one of those flights?
- Would the federal government be interested in buying our lot of masks?
- Given the obstacles we will likely face getting the lot here, we're considering reselling internationally.

Thank you.

David

1. Request for N95s (from last week, NOT NIOSH): we got news about an hour ago. We need a certificate from the Chinese manufacturer stating that they manufactured the items and authorizing us to distribute them here. We can expect to receive this request for surgical masks and the potential supplier of NIOSH N95s.

2. Surgical masks: I completed all the documentation this morning, and sent an official request. I will prepare an approval template for the factory confirming that they indeed produced the masks and that we will be distributing them in Canada.

3. V3 face shields: They got back to us last weekend. There was a lot of label documentation missing, which we completed and sent yesterday. They got back to us immediately to tell us that everything was okay with the labels, but that they couldn't proceed without a certificate attesting to our face shield's CSA compliance. Following a discussion with CSA this morning, I understand that their standard is much too stringent for our face shields, and that Health Canada should approve them without the certificate. I am supposed to hear back from a specialist in medical supplies at CSA today.

All of my requests are being sent through official channels using the Health Canada form [attached](#) and following the instructions on the [site](#).

I sent the requests to these addresses:

@hc.mdel.application.leim.sc@canada.ca

@hc.meddevices-instrumentsmed.sc@canada.ca

Thank you.
