Thanks Astrid,

It should be "up to 28.4m"

ID now: 2.5m base plus option for 5.4

I've also changed the Abbott lines to be less specific, so it reads:

As Minister Anand has announced, Canada has secured 23 million rapid tests from Abbott.

[In the coming weeks], the federal government will start sending these rapid Abbott Panbio and ID NOW tests to the provinces and territories. Both of these new testing technologies are quick and reliable.

Does that make sense to you?
