Subject: Non-Medical Industry PPE

This make sense to go out to PSPC, ISED and Health? Anyone else we would want to invite?

Hi Team,

Please see a release from the Canadian Chamber of Commerce.

<http://chamber.ca/media/news-releases/200424-ppe-supply-for-businesses-needed/>

I think we should anticipate increasing pressure from industry around PPE for the non-medical sector in the coming weeks.

I think it probably breaks down into three main items:

- 1) Masks – non-medical
- 2) Gloves
- 3) Hand sanitizer

Can we target Monday for a call on this just with political offices?

Items for each office to come prepared to discuss:

PSPC – Procurement marketplace both domestic and international
Health – Relative PHAC guidelines across industry
ISED – Domestic manufacturing capacity

Feel free to reach out over the weekend if you'd like to discuss in advance.

Matt
