Subject: Product Testing

Wanted to share with you the below info I got from PHAC on testing PPE. The steps taken as outlined in doc are determined by the below conditions/approach.

Jobina.

Level 1	Known supplier with history of performance, conformity to standards, and a signed Supplier Declarations of Conformity (SDoC)	No testing required
Level 2	Unknown supplier but evidence of conformity to relevant standards from recognized testing facilities and a SDoC	Testing may be required depending on technical analysis of provided conformity
Level 3	Supplier has not been used before , has no proof of	Testing Required

	conformity and/or no SDoC
