Hi Riley,

Adding Sabrina too.

Think we can “in the coming weeks” to the second tweet about vents if there is character room.

Otherwise I’m good.

Matt

Subject: POLICY REVIEW: Procurement update

Good morning Matt,

We’ve drafted the following tweets based on the PM’s draft remarks for today. Do you have any flags or edits?
Thanks in advance!

—

We’re working hard to make sure our hospitals and front line workers have the equipment and supplies they need to fight COVID-19. And on that front, we’ve signed an agreement with Galenvs in Montreal to manufacture magnetic silica beads, which are essential for COVID-19 testing.

This week, @GovCanHealth also certified ventilators made by two Canadian groups - @CAE_Inc and the Ventilators for Canadians consortium. This means they’ll be able to increase their production and supply the thousands of made-in-Canada ventilators that we’ve ordered.
