Hey Matt,

I got a call from Joel Strickland of Long North Capital who advised he has a lead on N95 masks produced by Kimberly Clark. They are currently in the United States and he wants support from the government regarding the border. Joel says that these masks are PHAC approved and could and his contact in the United States says they this could mean up to 2 million N95s per week.

I understand that he has some friends in PSPC department who he has chatted with previously but aren't necessarily in charge of procurement. So My question to you is, when we were dealing with all the procurement border stuff, did that go through PSPC MinO? What's your advice for who I should put him in touch with?

Thanks!
Elise
