Hi there - I assume someone at ISED PSPC or DPMO is in regular contact with GE about our ventilator order with them. Should we ask someone to call them up and see how things are going and try to get some intel re a potential US DPA? It looks like trump is going to DPA them if he hasn't already.

Also Elise and I were going to get on the phone with Kevin Bosch and 3M's GR person to see if they have any Can / U.S. intel and will relay afterwards!

Thanks!

We have an order of 500 ventilators with GE. Delivery schedule TBD.

Tristan

Wondering if we have an order with GE in the US?
It looks like the US is holding their feet to the fire to rapidly produce - it does not specify it is for domestic use but I assume it is? -

Separately, GE and Ford engineers are working together to boost production at a GE plant in Madison, Wisconsin, of a GE ventilator, different from the model licensed from Airon.

GE expects to double ventilator output from the Wisconsin plant during the second quarter, Tom Westrick, GE Healthcare's vice president for quality, said during a call with reporters on Monday.
