What is it that they can specifically provide? If they can't find specifics on [this list](#), I would advise to check with the Public Health Agency of Canada (PHAC) to ascertain what the national needs are. However, they would probably ascertain a more wholesome answer from the province as to what specific requirements there are.

The supply chain is essentially the provinces advise PHAC what they require and PHAC engages with us to fulfill those requirements. If it's a generic submission they made, then I would recommend they check-in with the province to ascertain what the specific requirements are since hospitals and municipalities are engaged with their respective provincial government.

Hi Dove,

Hope you are doing well!

A local business owner below had signed up to help through the online form to provide manufacturing for products.

But he wants to know next steps. Quoted his question below:

"For knowledge companies such as hours have the capacity to manufacture but without specifics on requirement (design, material, etc.) it is difficult to advise as many products are imports. Covertch has abilities and those have to be matched with requirements, near impossible to have exact as the products do not align with . We can manufacture screening booths, aprons, hoarding, all dependant on what is needed."

What can I tell him?

Hello:

We did complete the submission form late last week. There has been no confirmation federally, I did receive confirmation from Ontario including a file #.

For knowledge companies such as hours have the capacity to manufacture but without specifics on requirement (design, material, etc.) it is difficult to advise as many products are imports. Covertch has abilities and those have to be matched with requirements, near impossible to have exact as the products do not align with . We can manufacture screening booths, aprons, hoarding, all dependant on what is needed.

Good luck, I am resident of the riding you represent and we had met when I chaired a debate when I was President of Bnai Brith.

Best number to be reached if necessary is my cell. Information below.

Hi Henry

Thank you so much for offering to help out during this very critical time! The government and Minister Anita Anand has set up a website with a submission form for this purpose. You can see below.

If you have any questions please don't hesitate to reach out!

Hi Erika and Marco,

Reaching out to you in hopes you could help pass this info below. Henry Schnurbach's company could be of help for manufacturing of special products.

Please see their email below and let me know once received.

Hope the both of you are keeping healthy and safe.

Best,
-Lola

Yes Henry I received your Information from Ernie Lustig. I'll forward your offer to Minister Naveed Bains the Federal Minister of Industry and to Minister Marco Mendicino.

I have your cell and email so I will follow up with you.

I will get Lola in my office to follow up and see if we can deploy your company's expertise.

Mike

Hi Mike:

Ernest suggested I advise you of our ability to fabricate custom products. Our specialties are sealing and sewing for the swimming pool and construction industry and include inground liners, mesh safety covers, polyethylene tarps, solar bubble covers, hoarding etc.. Our products and processes with slight variation are adaptable to a variety of needs. Screening booths I understand is on the hot list as maybe other types of vinyl or polythene. Once we know what's required, our designers will work to make it happen.

Thanks
