Subject: Procurement - N95 Masks - The Privateer Group

Good Afternoon Miss Anand,

My name is Adam Favel, and I am the owner of The Privateer Group Holdings Incorporated, a BC corporation that currently holds MDEL License #14325, and who currently has submitted RFP proposals for E60PV-20ESS2/A and B.

I am writing to you to inform you of the other products that my company has available in regards to medical devices in the fight against COVID-19.

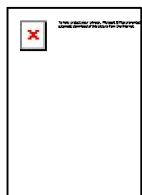

We are in the process of setting up a number of applications under the interim order from Health Canada to test and bring in new masks for use in Canada, including a number of N95 alternatives with the ability to be reused.

As well, I attach in this email our latest bulletin concerning our ability to supply **3M N95** Masks. Our stock is not affected by the current events or relationships in China or the US, has been confirmed by our network on the ground in the locations we have availability, and we are ready to work with Canada if desired to bring in these products at the price shown in the bulletin below.

If you or your team are interested in discussing this further, please do not hesitate to contact me back through this email, or at +12505509882.

Thank you

--

Adam F.
