Before placing machinery into market/service, the manufacturer shall ensure that the Technical File in accordance with related directives/standards in Community languages. The manufacturer or his authorized representative shall keep Technical File for a period of ten years from the last date of manufacture of the machinery.

We are busy coordinating all other related products such as hand sanitizers, gloves and gowns , has just secured a resource for close to millions of masks to be produced on a daily basis.

1) If FDA/ CE accreditation highly required ?

2) The quantity of each of disposable medical surgery masks, hand sanitizers , so we can arrange manufacturers to accommodate accordingly. Currently orders from the States and Europe keep them busy but my job is to ensure goods ordered in a highly timely manner.

3) Will our government support logistics from China to canada, especially in canada ?

It will be highly appreciated if you can answer my questions tonight With the time difference between canada Asia.

Regards.

Dear Madison,

Thank you so much for your immediate response, I can imagine about your workload now.

Quick question:

- How many disposable medical surgery masks is your department looking for at the moment? Since we can produce 10,million masks a day, I'm wondering about the capacity requested by the government.
- What's the specific requirement of N95 masks in need? The manufacturer recently exported to the U.K. and found different product requirements as needed in other part of the world.
- The mask manufacturers also has close contact with gloves, gowns ,sanitizer manufacturers ,with which they have worked closely exporting to South Korean , Europe and the States where the pandemic

alarms much loudly. I wonder if you can issue an authorized agent /supplier so I can help more, as I may not be the exclusive representative for all manufacturers. At this point, we just would like to get the BEST PRODUCTS at the fastest space into our country where we are experiencing the fear in the air, at the grocery store lineups and panic of lack of medical protective stuffs.

- No panic. Together we'll work it out. I am the speaker and co-organizer of the COVID-19 Support and Relief Group since late January, we've helped close to 300 people on self quarantine so far . We were reported by Global News, CBC TV/Radio and Calgary Herald. Premier retweeted a report on me and our group. <https://www.albertahealthservices.ca/topics/Page16944.aspx>

Regards.

Hi May- Han,

Thank you for showing interest in providing services and products related to the COVID-19 pandemic. In addition to leveraging existing sources of supply, PSPC is now proactively engaging industry to help meet Canada's needs.

Many of us are receiving information from potential suppliers or individuals with helpful information on the COVID-19 response. I invite you to this website: <https://buyandsell.gc.ca/calling-all-suppliers-help-canada-combat-covid-19>. As this website will continue to be updated, I encourage you to check back for new information that may be posted.

I have informed my team in Minister Anand's office of your proactive reach out.

Please do not hesitate to follow up with any questions, or share any relevant information that I can include in while tracking procurements (i.e. specific products, quantity available, production capacity).

Subject: Manufacturers with 20 million Medical Protective Masks produced on a DAILY basis

Good afternoon Ms. Taipalus,

Referred by my regional MP, I am writing to you with regard to suppliers for goods and services related to COVID-19 Pandemic.

We've more than a dozen of medical protective masks manufacturers with more than 20 million masks to be produced on a daily basis. All these manufactures are FCD accredited.

I'm attaching one of their credentials for your reference. I wonder what this reviewing process will be. How we, local Canadian business with international trade business with great resources worldwide can help you link DIRECTLY to manufacturers worldwide.

We understand that your department is reviewing the significant number of responses and identifying potential suppliers for the goods and services that may be required as the COVID-19 situation continues to evolve. Thank you and Canada is currently relying on your quality service for the country's GOOD. We look forward to your reply at your earliest convenience.

Regards.
