Also flagging that freeland did say premiers are saying they need ventilators but that's not coming through to PHAC from their healthcare systems

Re: her concerns,

1. We will be receiving goods over the course of a year in some cases. This doesn't necessarily mean we expect the virus to last that long, it can also mean we are replenishing the stockpile
2. I think she's confusing the respirator masks and ventilators. The former are disposable and we are ordering over 5M, the later require health care professionals to run and cost ~25K each.

550 is all the orders we have received. Provinces have not made asks to PHAC as far as Dr Tam and Hajdu are aware.

Just got word from ash that these docs are going to PTs at noon. Believe her second point is wrong on demand but told her to loop into her policy team to confirm.

Hi Emily & Tristan,

PHAC procurement numbers are attached. They are a bit concerning.

First look concerns:

- There is a procurement order to continue until July 24. Yes, we are expecting this virus will take that long.
- There are only 550 ventilators ordered – I believe that the demand is actually 5.5M.
