**Attachments:** Kem Krest - Hand Sanitizer SDS 2020-04-01 14\_14\_40.pdf

Hi Caitlin/Dov,

Sanitizer is in short supply in Canada.

We understand from a major national customer who is prepared to purchase our product that is made in Michigan that the liquid-based sanitizer is already acceptable for import so long as it is FDA approved (whereas normally, only gel-based sanitizer is approved for import).

Could you perhaps point us to the right person(s) to assist us with an expedited communication or decision on this matter relating to the attached safety data sheet? We can then quickly move to purchase product and service demand keen to keep Canada clean and help to prevent the spread!

Thank you so much!

Hi Sunir,

As you know, we have been diligently working with Kem Krest, the makers of a Health Canada-approved disinfectant to quickly start producing sanitizer. We have just received the SDS attached for the liquid sanitizer that we are now ready to procure and deliver!

We are hearing that the government of Canada is relaxing standards and allowing for liquid sanitizer to be imported, though I think it would be good to get a confirmation from Caitlin if possible.

Thanks!

Bev
