Subject: FOR FEEDBACK: Proposal for Critics Update

Hello—For the critics update, what does everyone think about using the following:

- Increases from last week based on current version of web table;
- Totals from current version of web table;
- Distribution numbers from PHAC. The rationale here is to present a new metric to distract somewhat from unattractive delivery numbers being reported. Hajdu goes into QP with these numbers, updated weekly, so we're in safe territory:
 - The Public Health Agency of Canada is receiving staggered delivery of shipments, and to date, has allocated approximately 2.5 million N95 respirators and equivalents (e.g., KN95 respirators; FFP2), 100 million surgical masks, 26.5 million pairs of nitrile gloves, 12 million face shields, and 2 million protective gowns to provinces and territories, and more is expected to arrive and be distributed in the coming days.
