**Subject:** Low Cost Ventilator

Brendan, here are some details on our constituent John Strupat who has designed a low cost and portable ventilator. Apparently is Mr. Strupat has received interest in his product from Germany and the UK but has not been able to generate interest here in Canada. We were contacted by a third party and not by Mr. Strupat directly. As I mentioned I did check out [buyandsell.gc.ca](http://buyandsell.gc.ca) but it does not list equipment or ventilators or any other equipment. I don't want to frustrate our constituent by pointing him in the wrong direction so any assistance would be appreciated to direct him to the correct department or agency to provide him an option to highlight his product.

here is a link to a CBC London article and video regarding the ventilator:
