Too broad? :

- a) We are ensuring that Canada has diversified sources of supply for goods and services.**

- b) We work with local businesses all across the country to provide supplies to Health Canada and National Defence, as well as construction contracts to renovate buildings and update infrastructure.**

- c) We are focused on working with Canadian industry so they can continue to innovate and grow.**

I will look for something, but it sounds like what she's looking for is how we can get around international trade agreements to give Canadian companies preference and the answer is we can't without invoking the NSE.

Tristan

Do you have any old lines on domestic contracting vs foreign procurement?

Hello Elliott,

The PM will be having a discussion with one of our stakeholders tonight—could you send me your lines on local procurement, and how the government can speed up local procurement in public contracts and revise the criteria to allow more room for Canadian manufacturers—while respecting free trade agreements?

Thank you,
AM
