Importance: High

Good Morning,

I'm writing to follow-up on the inquiry below, to see if you had any information as to whether private companies can participate in government contracts for COVID-19 supplies.

Thank you,
Darian Mills

Subject: PSPC Question - government contracts
Importance: High

Good Afternoon,

We have been approached by a constituent, who has inquired if there are any government contracts for masks, shields, gloves, goggles, thermometers and gowns, that private companies can participate in?

Please see the email string below for clarification and more details.

Are you able to provide any information on this inquiry?

Thank you,
Darian Mills

Hi Darian,

Thanks, the message you sent me below is for a company that wants to supply product to the Govt.

I am asking if the govt in its procurement process for obtaining PPE from inside or outside of the country has a system in place to allow private companies to participate in prices/products that the govt is already set up to do.

For example if the govt has purchased disposable masks can a company like mine participate and take advantage of the Govt buying power and contracts.

s

Good Afternoon Steve,

Thank you for reaching out.

On March 12, the Government of Canada issued a call to suppliers to find out what goods and services they could provide to support Canada's response to COVID-19. Over 26,000 submissions were received. As a result, the government was able to secure and distribute the PPE and medical supplies that were most immediately required. The call to suppliers is now closed. However, goods and services for COVID-19 requirements will be procured through tender opportunities posted on the buyandsell.gc.ca website.

For more information you can visit:

<https://buyandsell.gc.ca/supplying-goods-and-services-in-support-of-canada-s-response-to-covid-19>

The Government of Ontario has also established a webpage where you can submit your proposal to supply emergency products to help fight the coronavirus. Please visit the following link for more information:

<https://covid-19.ontario.ca/how-your-organization-can-help-fight-coronavirus/#supply-products>

I hope this information is helpful.

If you have any further questions, please don't hesitate to contact us again.

Thank you,
Darian Mills

Hi Darian,

You helped me out with getting a container released with PPE (isolation gowns) last month. We work exclusively in the healthcare field. Our customers are Long term care and retirement homes. One of our corporate clients is setting up a pandemic supply source and have asked us if we can provide items (ones that we normally don't do).

Masks, shields, N95 masks, gloves, goggles, thermometers, disposable isolation gowns.

Do you know if there are govt contracts for these items that we can participate in?

Thanks,

Steve
