Subject: Importation of Disposable Medical Masks Type II 99.5%
Importance: High

Hi Mrs. Anand:

I hope this email finds you well. We have received your name for contact through various sources. Currently we are offering medical/hospital grade disposable masks. The manufacturer is Health Canada approved. We have applied through the website buyandsell but feel it might get lost in all the applications hence the reason for this direct email to you.

We have been in business and importing in Canada for over 21 years and have excellent standing with importing with CBSA. We have the capacity to import very quickly 1.3million masks in 7days with an air delivery and boat delivery through our freight forwarders. We have the best prices possible not only for the top approved grade but even in comparison to type I disposable masks our price is still the best on the market.

We have all lab reports/tests and packaging pictures etc. Currently the same manufacturer holds authorization for disposable coveralls which we are currently waiting for the same material to be made in an isolation gown. We are awaiting Health Canada approval as a formality since their fabric has already been tested and approved. We can produce 100,000 units/7 days.

Our reference submission number is 63504. We can forward any documentation you need including prices/quantities.

I hope to hear from you soon.

Many regards
Laura Iannizzi
