Subject: FW: Free Online COVID-19 Test

Hey Caitlin,

Who would be the best person to speak to them? I can do it if you think that's the best course of action.

Thanks!

Chelsea

Subject: Free Online COVID-19 Test

Hello Ms.Kusnick,

I spoke to someone from Parliamentary Secretary Steven MacKinnon's office who recommended I reach out to you.

We are a volunteer movement developing a free, instant and remote coronavirus test based on the unique auditory cough patterns caused by the virus. Our technology uses advanced deep learning and signal processing techniques to 'learn' what COVID-19-specific cough patterns sound like. These algorithms are designed and trained by Oxford, Cambridge and Stanford-trained researchers. Theoretically, this technology could instantly and remotely screen millions of patients' in seconds to detect the transmission of COVID-19.

We'd love to talk to someone within your government about potentially integrating this technology into Canada's reopening strategy.

More info about the project including a thorough scientific explanation can be found here: <https://www.novoic.com/covid-19>

Hope to hear from you soon,
Kabisan Thanendran
