Thanks Jayme.

Chelsea - could you follow up on this one? And add to the tracker :)

Thx

Hi Caitlin,

Not sure who to direct this question to, but I am hoping someone from the department could follow up with this constituent?

Thank you,

Jayme

Hi Jayme,

I did fill in the forms when they first were introduced but had not heard back, so, I was trying to follow up.

I really believe in the solutions; so, hopefully they get reviewed.

Best Regards,

Mike

Hello Mike,

Thank you for showing interest in providing products related to the COVID-19 pandemic. We appreciate your desire to step up and help our community and country during this uncertain time.

Our government has created a form that we are inviting businesses offering their services to complete. This way, all of the information and offers can best be evaluated. This form can be found through the following link:

<https://buyandsell.gc.ca/calling-all-suppliers-help-canada-combat-covid-19>.

Again, thank you for offering your support. If you have any questions or concerns, do not hesitate to reach out to our office.

Sincerely,

Jayne Wilson
Constituency Assistant

Dear Honourable Ms. Anand,

To ingratiate myself a little: I am based in Oakville and once upon a time was the president of the Mississauga Centre Federal Liberal Riding Association.

I want to help in the current crisis. I have 12 years experience in disinfectant and sanitizer manufacturing but have been involved with microbial detection more recently.

In the chart below and on my website I am showing how I can help: <https://www.brownsbiosecure.com/blog> .

Don't hesitate to get me involved if you also need some disinfectant and chemical and PPE cost and pricing history as I have a lot of insight in this area as well.

Question	Your response
<p>1. What medical products or equipment would you be able to supply?</p>	<p>1) Sensitive PocketSwab Plus used with Charm's novaLUM® II-X ATP Detection System</p> <p>Detect organic food soils/residues/microbes at the lowest possible level. We have helped significantly reduce pathogen positives of customers using our sensitive ATP test. Use of swabs on surfaces helps to prove good efficacy regarding the cleanliness of a surface. This is especially important to prove control regarding pathogen cleaning procedures. https://www.brownsbiosecure.com/pocket-swab</p> <p>2) Disinfection gates</p> <p>The use of the decontamination gate at the operational borders prevents the spread of the pathogen from the outbreak operation. The gates are used by agricultural livestock operations, food processing companies, and local authorities such as districts, towns and municipalities but also by fire brigades or animal disease societies https://www.brownsbiosecure.com/disinfection-gate</p> <p>3) Mobile foaming system for cleaning, sanitizing or disinfecting</p> <p>The Foam Trolley comes with a 200 L solution tank to clean, sanitize and disinfect your food or agricultural or municipal, provincial, federal facility, equipment or structure. It has everything needed on board: foam lance, flat jet lance, coarse-drop sprinkler head and rinsing lance https://www.brownsbiosecure.com/foam-trolley</p>
