**To:** 'seblais@turtlebrace.com'  
**Cc:** P [REDACTED] 'Michel Tubie'; 'Carmela Martinez'  
**Subject:** RE: Face shields and gowns

Hello M. Blais,

Sorry for the delay in responding to you.

I would suggest you check the Guidance page to submit an application for authorization under the Interim Order. The Interim Order is in place to assess information received regarding the device's quality and efficacy but with reduced requirements from the ordinary Med Device pathway.

Guidance: <https://www.canada.ca/en/health-canada/services/drugs-health-products/drug-products/announcements/interim-order-importation-sale-medical-devices-covid-19/guidance-medical-device-applications.html>

The application form is at the end.

Please let me know if you have further questions.

Best,

Chelsea

**Subject:** RE: Face shields and gowns

Hi Chelsea,

Thanks for the information on the homologation, but that part I already knew about it.

My request was for antiviral testing.

We are working on a new kind of disposable surgical gowns covered by an active antibacterial and antiviral agent. That gown will give and added protection to the wearer, but will also significantly reduce the transmission vector from passing to one room (or patient) to an other.

The gown could be worn for more then one time, hence reducing the number of gowns needed in a time of shortage.

We are looking to do the testing as soon as possible so that we can start production of these gowns.

I hope you can find someone to help us help Canadian caregivers.

Here are more information.

- This new gowns will respects the norms for level 3 and 4 (liquid and blood penetration)
- Our product is composed of silver nanocrystals with a bonding agent to fix it to different surfaces.
- It already passes the AATCC 100 tests for bacteria, and has shown its great efficiency.
- Studies presented in the NBIC gives us reasons to believe that the silver can also be a great antiviral protection.

Hi Serge-Eric,

My colleague was very speedy in getting back to me.

All the information you need can be found here: <https://www.canada.ca/en/health-canada/services/drugs-health-products/medical-devices/covid19-personal-protective-equipment/gowns.html>

You already have an MDEL, so it's just a matter of making sure the gowns meet the standards outlined on the website.

Please let me know if you have any other questions.

Thanks,

Chelsea

Hello Mrs Kusnick,

I'm sorry for the delay in responding for your request. I've tried to do an amendment to our previous form, but the system didn't want to accept our reference number. So I made an other submission.

You can find our product information under the number 57738 or 459921.

We are offering face shields for now:

Face shields

- **100% Canadian**
- 9\$/units for minimum order of 10000units.
- 20000 units/ week production capacity
- 10000 units in stock
- Meet and surpass CSA standards Z94.3:20
- **Made of recycled plastic, the shields are recyclable**

Our licence is 7450, and the product ARN 314198

We are here to stay and sale around to world. It would be nice to become an official supplier of the Canadian government. We are local!

We also have a new product for disposable surgical gowns. The gowns can be use for more then one time and are covered with and active anti-viral (and anti-bacterial) agent. **We need an official homologation, can you help us fast track the testing?**

Cordially,

Serge-Eric Blais, o.p.d.

Hello Mr. Blais,

Thank you for reaching out.

I invite you to fill out the form on this portal: <https://buyandsell.gc.ca/calling-all-suppliers-help-canada-combat-covid-19>. Once you've submitted the form, please send me the reference number you receive so I can follow up with the department for you.

I will pass along your details to our procurement experts who will reach out to see if we can work together to provide protective equipment to our frontline workers across Canada.

Thank you very much for your support. Please let me know if you have any questions.

Best,

Chelsea Kusnick
