Hey David,

I believe the information your constituent is seeking is actually already public. In May the Government of Canada announced that we've signed a long term agreement with Medicom for the domestic production of 20 million N95 respirator masks and 24 million surgical masks per year, for the next 10 years. I've included some sources below.

<https://www.newswire.ca/news-releases/medicom-announces-long-term-supply-agreement-with-canadian-government-in-support-of-new-mask-production-facility-875716581.html>

<https://www.tpsgc-pwgsc.gc.ca/comm/aic-scr/provisions-supplies-eng.html> (look for medicom in the list)

Thanks,

Tyler

Hi Dove – Here below is a question from the Speaker's riding related to Medicom's interest in securing a supply chain agreement with the GofC. Are you in a position to respond?

Thanks if you can help,

David Small

Subject: Potential Medical Mask Project for Northern Ontario
Importance: High

Good Morning Mr Rota,

As you know Fabrene, Inc. (a subsidiary of Berry Global) has been making woven materials in North Bay for over 50 years. During the Covid-19 crisis, our facility has re-directed some assets to produce medical gown fabrics for front line workers in both Canada and US. Our company is now working with Medicom, a leading manufacturer of medical masks, to install new equipment in North Bay to support mask making capabilities in Canada. It appears Medicom is in discussions with the Canadian Government to secure a supply chain agreement. The investment for our site is in excess of \$10M, with the potential to hire another 20 people. Medicom is taking the lead on this initiative and Fabrene is not trying to intercede, however, we would truly like to know if the Canadian Government is seriously considering this type of project or if it is only a pipe dream.

If you could "quietly" investigate, it would be much appreciated. Timing is critical.

Sincerely,

Rob Valenti
