A few quick observations (maybe late)

- Deliveries might be interpreted as deliveries to us or deliveries to provinces. Might want to clarify
- Don't we want to keep mention Thornhill on ventilators even though it is a bit older
- On reagent, we might want to mention how long this supply will last (I believe it was 15 weeks but please validate).

Here's the bilingual version if you want to check my French:

(French follows below)

Dear colleagues,

Following up from our discussion today, here are the updates to the status of procurement in a number of key areas.

Given the high global demand for these goods, there is a possibility that not all contracts will be entirely fulfilled. This has been considered in the procurement approach, and additional steps are being taken to meet our goal of being as prepared as possible.

These numbers are subject to potential revision as deliveries are assessed.

N95 masks

We have signed additional supply contracts for N95 masks raising our total orders to 166 million.

Three flights arrived over the weekend carrying around 2 million N95 masks. These will need to be validated by PHAC before being confirmed (this involves both inventory and quality testing).

Surgical Masks

Our confirmed orders for surgical masks have increased to over 330 million as a result of additional supply contracts.

Our total delivered to date is nearly 18 million we expect this number to rise in the coming days as new deliveries are confirmed.

Ventilators

We have finalized orders of up to 30,000 ventilators with CAE, Starfish and Ventilators for Canadians — all three are Canadian Companies. That brings the total to 32,070.

Test Kits

We have received a flight with a large shipment of the necessary base chemical ingredient for reagent production and it has already been delivered to Fredericton to support LuminUltra's production increases.

LuminUltra projects that this shipment will provide for enough reagent to support 7.5 million tests. Initial quantities of reagent are expected from them this week, and they are moving toward being able to supply up to 500 thousand tests per week beginning next week.

Cher collègues,

Suivi de notre discussion aujourd'hui, voici les mises à jour que nous avons fait sur l'état d'approvisionnement dans quelques domaines clés.

Compte tenu de la forte demande mondiale pour ces biens, il est possible que tous les contrats ne soient pas entièrement remplis. Cela a été pris en compte dans l'approche d'approvisionnement, et des mesures supplémentaires sont prises pour atteindre notre objectif d'être le plus préparé possible. ***Ces données sont susceptibles d'être révisés à mesure que les livraisons sont évaluées.***

Masques N95

Nous avons confirmé des contrats supplémentaires, portant nos commandes à 166 millions de masques N95.

Trois vols sont arrivés au cours du week-end portant 2 millions de masques N95. Celles-ci devront être validées par PHAC avant d'être confirmées (ce qui implique des tests d'inventaire et de qualité).

Masques chirurgicaux

Nos commandes confirmées pour masques chirurgicaux ont augmenté à plus de 330 millions grâce à des contrats d'approvisionnement supplémentaires.

The total livré jusqu'à maintenant est près de 18 million. Nous prévoyons que ce nombre augmentera dans les prochains jours à mesure que de nouvelles livraisons seront confirmées.

Ventilateurs

Nous avons complété des commandes de plus de 30 mille de ventilateurs avec CAE, Starfish et Ventilators for Canadians — tous les trois sont des organisations Canadiennes. Cela porte le total à 32 070.

Trousses de test

Nous avons reçu un vol avec une grande quantité de l'ingrédient chimique de base nécessaire pour produire la solution de réactifs et il a déjà été livré à Fredericton pour soutenir les augmentations de production de LuminUltra.

LuminUltra prévoit que cette quantité fournira suffisamment de réactif pour créer 7,5 millions de tests. Les quantités initiales du réactif sont attendues de leur part cette semaine et ils s'acheminent vers la possibilité de fournir jusqu'à 500 000 tests par semaine à partir de la semaine prochaine.

Subject: DRAFT: Email to Critics April 21, COVID 19

Hi everyone,

Please see below the draft email Chelsea would be sending to critics following today's call with the critics.

Please let us know if you have comments, the preference is that the document is sent out this evening.

Dear colleagues,

Following up from our discussion today, here are the updates to the status of procurement in a number of key areas.

Given the high global demand for these goods, there is a possibility that not all contracts will be entirely fulfilled. This has been considered in the procurement approach, and additional steps are being taken to meet our goal of being as prepared as possible.
