OK thanks. I know Quebec were contacting Macron's team today since it's apparently produced in France.

Subject: Lack of reagent

Not aware, ail of this needs to flow through PHAC.

If there are problems there, then we can assist.

But they are equipped to deal with these requests.

Subject: FW: Lack of reagent

Hello Matt,

Quebec will apparently to not have enough "reactif" (I think it's called reagents in English) to continue testing in a few days.

Are you aware?

Olivier

Lack of reagent.

Reagent: Product to extract the RNA (viral load) from the sample in order to perform the test. The only product compatible with our current equipment. We would at least need enough reagent to last a few days until we can get back on track. Yvan will get back to me with the minimum amount we would need.

Company: Biomérieux
