| The Platelia SARS-CoV-2 Total Ab assay is an in vitro test, in a one-step antigen capture format, for the detection of IgM/IgA/IgG antibodies to SARS-CoV-2 in human serum and plasma (EDTA, heparin, ACD or citrate) specimens. The assay can be used as a screening tool for the detection of anti-SARS-CoV-2 total antibodies in order to determine general population seroprevalence and/or individuals' immune status regarding exposition to SARS-CoV-2. Platelia SARS-CoV-2 Total Ab can be used manually or on automated systems. This test should not be used for screening of donated blood. Results from the Platelia SARS-CoV-2 Total Ab assay should not be used as the sole basis for diagnosis or for informing infection status. Canadian testing facilities are required to report all positive results to the appropriate public health authorities. | | | | |
